A Breath of Life Anew

MMMHMC's **Newborn Emergency Transport Service (NETS)** launched in 2015 is the **FIRST** in the Philippines with the purpose of reducing infant morbidity and mortality and bringing critical care services for high risk/sick neonates in Ilocandia.

The survival rate significantly increased from 75% in 2016 to **100% by 2020.**

40
DAYS TO GO

MMMhmc is the home of

the FIRST state of the art FibroScan in Luzon.

This Liver Elastography machine:

- quantifies the liver fibrosis/cirrhosis,
- measures the amount of fat in the liver,
- and risk stratification and management of cirrhotic patients.

MMM&MC's Integrated Referral & Disaster Management System

TANGGUYOB

37
Days to go

“**Tangguyob**”, originally coined for a local carabao-horn instrument used in the early days to summon people for tribal meetings, is a system which was developed by the joint partnership of MMM&MC's Integrated Hospital Operation Management Program (iHOMP) Unit and the Provincial Government of Ilocos Norte (PGIN) to implement a more centralized, timely and faster coordination and referral system among health facilities in Ilocandia.

In 2022, there were **75 facilities enrolled** and **3666 referrals** using the system.
